

PUBLIC TRANSPARENCY REPORT

2025

Cuprum afp

Generated 24-11-2025

About this report

PRI reporting is the largest global reporting project on responsible investment.

It was developed with investors, for investors. PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders. This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2025 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2025 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

SENIOR LEADERSHIP STATEMENT

SLS 1	CORE	N/A	N/A	PUBLIC	Senior Leadership Statement	GENERAL

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

As a company we understand that our success depends on good financial performance, but also on the way we relate to society as a whole to enable us to continue to deliver our services in the long term. To meet this goal, we have defined a responsible investment strategy. AFP Cuprum understands responsible pension fund management as the integration of sustainability considerations into the investment processes and practices associated with asset ownership, in the belief that such considerations can have an impact on the long-term financial performance of Pension Funds. Some important commitments that have been made are:

- To subscribe the "Acuerdo Verde" or "Green Agreement" of the Ministry of Finance of Chile to work towards climate change mitigation and adaptation.
- To provide continuous training and education to the investment team in order to be updated with best practices in sustainable investing.
- To participate in instances promoting the adoption of sustainability factors in investment management, the reporting of sustainability factors and metrics material for companies and the implementation of sustainability strategies that include ESG risks. These may include voting, engagement and media/events participation.
- To maintain a high coverage of ESG integration across the Pension Funds.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards
- In terms of governance, the Responsible Investment Committee met twice this year, where the main sustainability risks were monitored and decisions were made over the possible action plans. The Committee was also responsible for deciding which engagement processes to start next or in the future.
- Regarding ESG analysis and integration, we revised our internal methodologies and applied those changes for Chilean companies and for Chilean alternative funds with the purpose of refining the analysis and evaluating the aspects we find more valuable and material to the sustainability of the investments.
- In terms of engagement, we conducted 7 direct engagement processes, three with Chilean companies, and four with external managers.

- We took part in several webinars, congresses and presentations related to sustainable investing both in Chile and internationally.
- We actively took part in the public-private taskforce with the Ministry of Finance of Chile in the context of the Green Agreement which has the objective to advance on climate change. Specifically, we led the "Disclosure and Compliance" group and led one of the two study cases at the "Implementation of the Taxonomy" group.
- We published relevant ESG information through the annual Sustainable Investing Report, our voting records and Annual General Meetings participation.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

To advance in our commitment to responsible investment, we will work on strengthening the processes of analyzing Chilean companies and alternative assets, expanding its coverage, and engaging with them. Additionally, we will work on evaluating best practices related to climate change integration in order to better incorporate those risks in the investment process. Finally, we will continue to communicate and promote responsible investment practices.

(A) Yes, within our standard planning horizon

(B) Yes, beyond our standard planning horizon

Specify the risks and opportunities identified and your relevant standard planning horizon:

We have identified climate risks in our direct investments such as drought for water reliant companies. For external managers, we focus on the assessment of the process to identify and incorporate climate-related risks and opportunities. The standard planning horizon is longer than our strategic asset allocation one, that is, more than 5 years.

Does your organisation integrate climate-related risks and opportunities affecting your investments in its overall investment strategy, financial planning and (if relevant) products?

(A) Yes, our overall investment strategy, financial planning and (if relevant) products integrate climate-related risks and opportunities

Describe how climate-related risks and opportunities have affected or are expected to affect your investment strategy, financial planning and (if relevant) products:

Climate risks are incorporated to the traditional risks (credit and market risk) and then assessed in a holistic way to affect the investment decisions. For external managers, the selection and monitoring processes include how they are addressing climate related risks and opportunities when investing.

Does your organisation have a process to identify, assess, and manage the climate-related risks (potentially) affecting your investments?

(A) Yes, we have a process to identify and assess climate-related risks

(1) Describe your process

For direct investments those risks are identified when doing the financial analysis of the company, highlighting the ones that are financially material. For externally managed assets those risks are identified at the due diligence process where specific climate related questions are asked. Same questions are also monitored.

(2) Describe how this process is integrated into your overall risk management

Both for direct investments and externally managed assets, climate risks are assessed together within traditional financial risks (credit and market risk), in a holistic way.

(B) Yes, we have a process to manage climate-related risks

(1) Describe your process

Both for direct investments and externally managed assets, those risks are managed through monitoring and engagement. The Sustainable Investment Committee has the role to monitor sustainability risks, including climate risks, and to decide which companies or managers will be engaged.

(2) Describe how this process is integrated into your overall risk management

As climate-related risks are assessed in a holistic way, they are reviewed in specific committees for each asset class but also in the Sustainable Investment Committee. In both instances risks are evaluated, and then engagement and investment decisions are made.
